Fence at 2255 Clove St. (built in 2017/2018)

- If the fence was built in 2017/2018 and there has never been an incident where a driver could not see a pedestrian or a car on the road why are we here?
- **We are here:**
 - 1. I trusted the contractor who build the fence when they said a permit was not needed to build on my property.
 - 2. A person lied and said they could not see cars through my fence (this person is the neighborhood bully). Yet the house across the street from me with its 6 ft hedges that block the line of sight to cars and pedestrians coming down Clove St did not concern this person at all.

- **Reasons to save the fence:**

1. Visibility of sidewalk & street (fence is see through) no blind spots
2. Fence is the lamp post for Whittier and Clove St. (lamp on Whittier has not worked in 10 years).
3. Joy the yard gives to visitors and neighbors alike.
4. Hate bullies.
5. Discrimination: so many corner houses in the neighborhood have 6ft or higher bushes that block the line of sight on the road and sidewalk.
